

1

(1) $7\frac{1}{2} \div \left\{ \left(1.73 \times 11 + 0.27 \times 11 \right) \times 3 - 6 \right\} = \boxed{}$

答

(2) $2024 \times 6.48 + 2024 \times 1.54 + 2024 \times 2.74 - 2024 \times 0.76 = \boxed{}$

答

(3) $3 \div \left\{ 1\frac{1}{2} - \left(1.6 - 0.6 \times \boxed{} \right) \times 0.625 \right\} = 4$

The first two studies were conducted in the United States, and the third was conducted in the United Kingdom. The first study was a cross-sectional survey of 1,000 U.S. adults, and the second was a longitudinal survey of 1,000 U.S. adults. The third study was a cross-sectional survey of 1,000 U.K. adults. The first two studies found that the majority of respondents (approximately 70%) reported that they had used a mobile phone to access the Internet at least once in the past month. The third study found that the majority of respondents (approximately 60%) reported that they had used a mobile phone to access the Internet at least once in the past month. The first two studies also found that the majority of respondents (approximately 60%) reported that they had used a mobile phone to access the Internet at least once in the past month. The third study found that the majority of respondents (approximately 50%) reported that they had used a mobile phone to access the Internet at least once in the past month.
